

MAGICSTREAM®

MAGICSTREAM® LAMINARS

Crystal Clear by Day, Dramatic Color at Night

MagicStream laminars create totally clear, uniform arcs of moving water that originate from either your pool deck or surrounding landscape. At night, these translucent streams are brilliantly colored with an LED light source. The result is a water effect that adds an elegant bit of entertainment to your poolscape.

- Water arcs reach up to seven feet high and project out eight feet into your pool, spa, or other water feature.
- Installation is made flush to your deck or other surface; no unsightly or unsafe edges, just the magic of water erupting from a hidden source.
- Nighttime color effects include the ability to hold a steady color or scroll through a range of available colors. A microprocessor-controlled, color-changing LED lighting system is at the heart of the MagicStream laminar. It has three distinct programs—synchronized, random, party and can freeze on a single color.
- For a more enriched nighttime experience, a solenoid is integrated into the LED system to add a bright spot of light as it follows the arc into the pool or spa.

MAGICSTREAM[®]

LAMINARS

Enhancing the Entire Sensory Experience

MagicStream laminars clearly add to the sights of your backyard sanctuary. But, they also provide a gentle, soothing auditory experience as the stream gently enters your pool—just a hint of sound to mask neighborhood noises that may otherwise interrupt your down time.

Features Include:

- Laminar box lids available in tan, black and gray to match or complement pool deck or other installation surface.
- Laminars are easily adjusted two ways; vertically from 62° to 75° to create different heights and arc shapes, and the direction the arc is pointed can be moved right or left up to 60° total. Get creative by varying individual stream's height, arc shapes, direction and color.
- MagicStream laminars come fully assembled and ready to install on nearly any water return line. To create spectacular nighttime effects, an LED light engine is included. Simply add plumbing and a 12V pool transformer to provide power.
- Laminars are designed for easy removal and replacement.
